

PIERCAN drybox gloves

Reference Guide: Standard Models

To find **the reference number** of the glove that meets your needs, follow **these steps**.

1 IDENTIFY THE FIRST 2 DIGITS OF THE REFERENCE

The choice of the shape and diameter of the glove port will give you the first two digits of the reference number. Measure the diameter of your glove port and refer to the table below.

SHAPE	DIAMETER OF GLOVE PORT					
	136mm	156mm	186mm	220mm	250mm	300mm
AMBIDEXTROUS						
Tapered		10	13/16	18	85	97
Accordion sleeve	14					
Accordion sleeve (wide wrist)	54					

2 STANDARD LENGTH OF YOUR GLOVE

Our gloves essentially come in the following standards lengths: 750 mm and 800 mm. For other lengths, please contact us.

97 800

3 CHOOSE YOUR MATERIAL

97 800 Eb

Natural rubber	H

10 000	7 - 8 - 9 - 10	7.5 - 8.5 - 9.5
13 000	7 - 8 - 9 - 10	
14 000	6 - 7 - 8 - 9	
16 000		9 - 10 - 11
18 000	8 - 9 - 10	8.5 - 9.5 - 10.5
54 000		9.5
85 000		9 - 10
97 000	9	8.5 - 9 - 10.5

Thickness
4/10mm

97 800 Eb 9 E4

5

CHOOSE THE THICKNESS

PIERCAN offers two main thicknesses: 4/10 mm: E4 and 6/10 mm: E6

GLOVE MARKINGS

1. The marking consists firstly of **the reference number**.

For example, as shown opposite; the shape and the diameter of the glove port (97) the length (800), the material (Eb), the size (9), the glove thickness (E4) and the thickness of the cuff beading (5).

2. The reference number is followed by the **IT code** (003039), **issue number** (FR330010), the **lot number** (1901) and the **expiry date** (31/01/2022).

PACKS

NATURAL RUBBER,
NEOPRENE

Drybox gloves made from **natural rubber and Neoprene** are sold in packs of **20 units**.

OTHERS

Drybox gloves made from all other materials are sold in packs of **10 units**.

GREATER CHOICE: NON-STANDARD MODELS

The document concerns the **standard models**, which have the very best lead times. Other **non-standard models** are available, so please do not hesitate to contact our sales team for more information.
